

Reflections on Yamamoto & Bellgran, 2010

Introduction

Do the Introduction justify the paper?

What is the aim of the paper?

Introduction

Aim of the paper:

”...to present a fundamental mindset that drives improvements towards lean production”

Theoretical framework

Reflections on the theoretical part?

Case study

So, let's view the case study!

Case study

**Reflections on the described
improvement events?**

Guidelines

Process

Eight guidelines for problem solving in Kaizen

Finding problems

(G1) Observe Gemba with severe eyes

(G2) Never be satisfied with current operation

(G3) Repeat why when one sees abnormalities

(G4) Do not blame operators but blame system or standard

Generating solutions

(G5) Use wisdom thoroughly before using money

(G6) Create temporary solution even if the optimal solution is unknown or takes time to be implemented

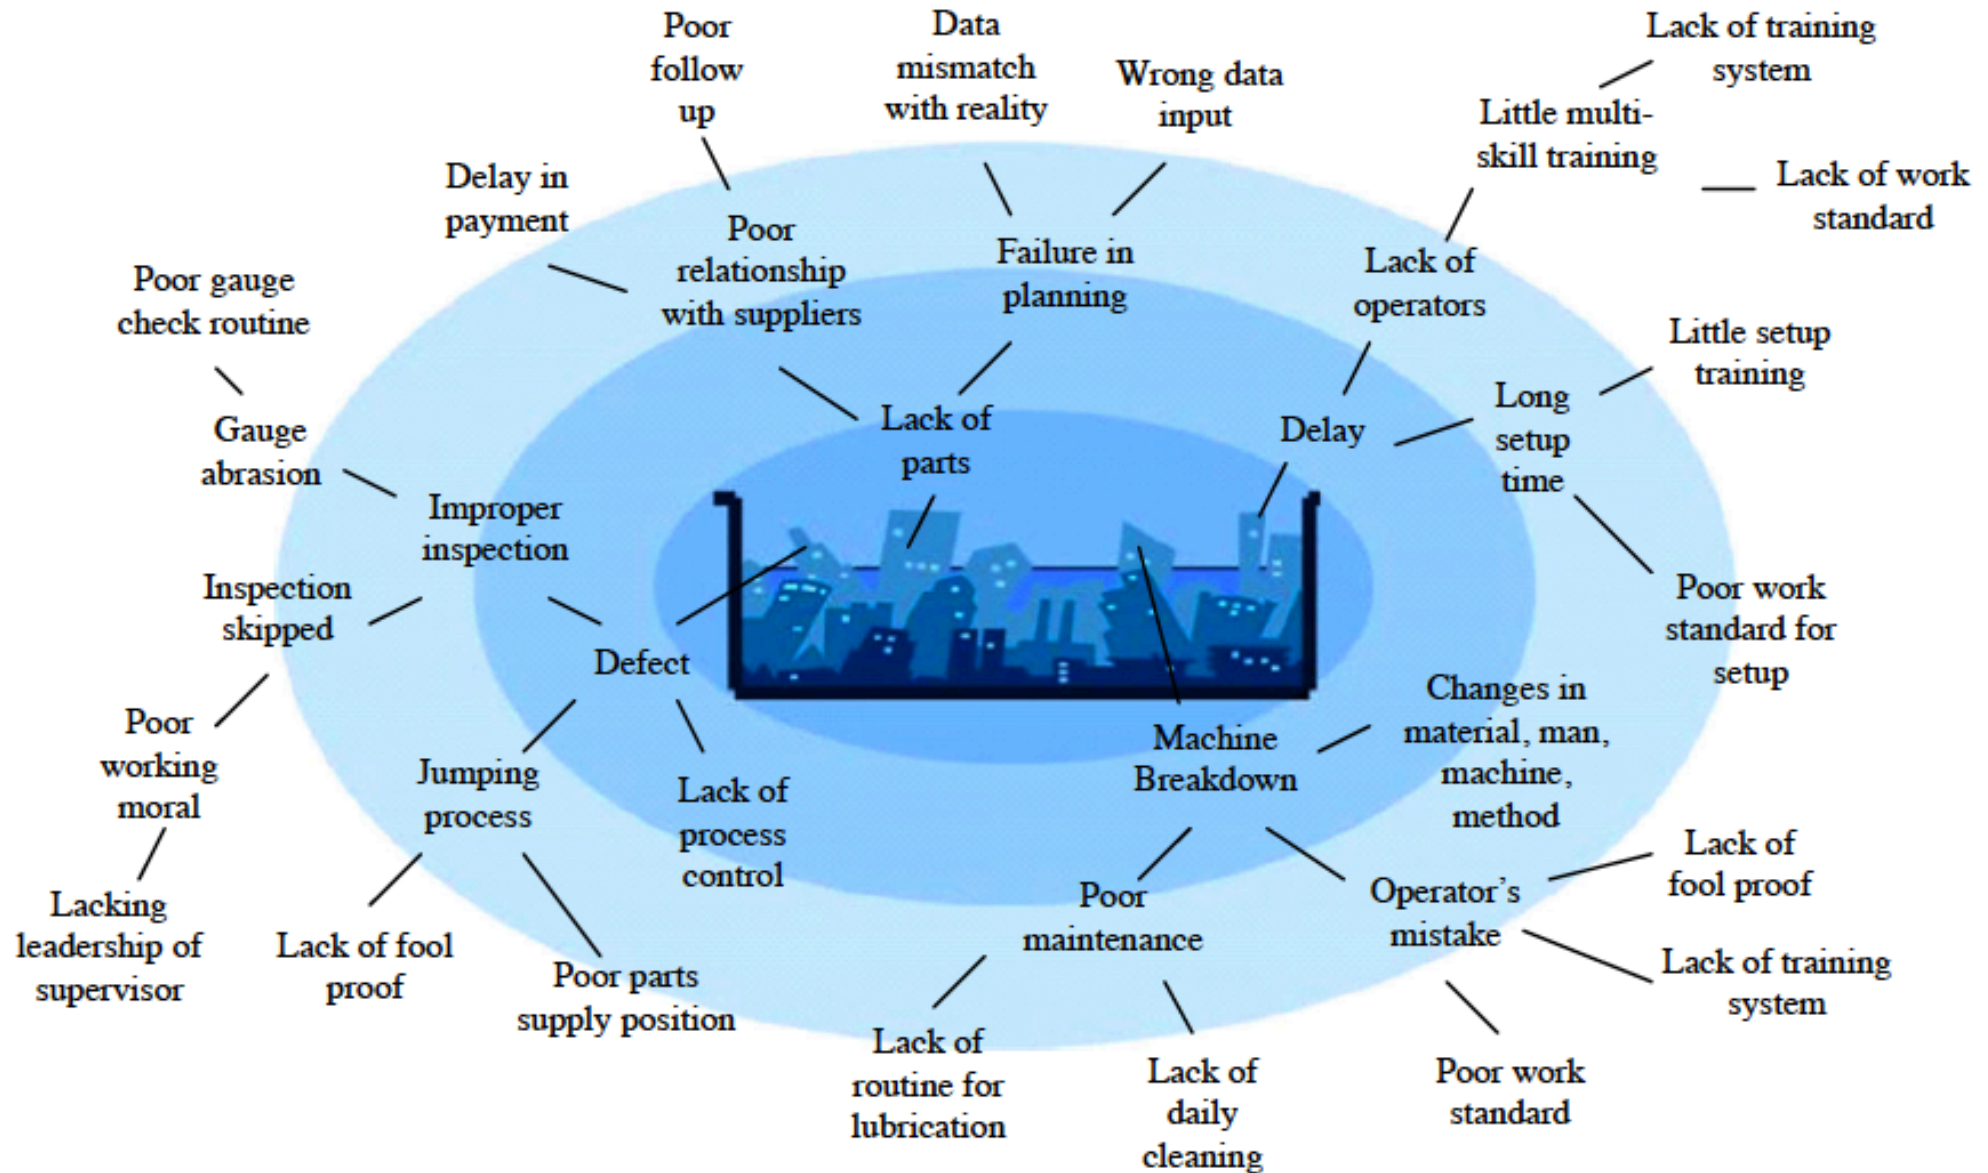

Taking actions

(G7) Initiate change immediately when a solution is available

(G8) Initiate change even if there is an uncertainty, more improvements will be found after change

Linking problems and causes

Discussion and Conclusion

Reflections on the discussion and conclusion?

Reflections

Did you learn anything from this paper?

Does the paper fulfill its aim?

Is this paper scientific?
